Student Affairs

2014-2015

New Employee Handbook
MISSION

The Division of Student Affairs creates a supportive environment for student learning and achievement by providing essential campus services, innovative programs, and state-of-the-art facilities that complement the University's academic mission. We foster personal growth, skill development, and broad-based experiential learning in a diverse community which contributes significantly to students' overall success at the University of Nebraska-Lincoln and prepares them for life-long personal and professional enrichment.

VISION

The UNL Division of Student Affairs aspires to be a national leader in serving both current and future generations of students through:

- collaboration with other university entities
- establishment of quality programs and services for students
- construction and maintenance of facilities that support and enhance the student learning experience
- utilization of state-of-the-art technology
- recruitment and retention of outstanding student affairs professionals

CORE VALUES

The UNL Division of Student Affairs embraces the University of Nebraska-Lincoln Core Values of:

- Learning that prepares students for lifetime success and leadership;
- Excellence pursued without compromise;
- Achievement supported by a climate that celebrates each person's success;
- Diversity of ideas and people;
- Engagement with academic, business, and civic communities throughout Nebraska and the world;
- Research and creative activity that informs teaching, fosters discovery, and contributes to the economic prosperity and our quality of life;
- Stewardship of the human, financial, and physical resources committed to our care.
As the University of Nebraska-Lincoln community becomes more diverse, we can expect individual and group needs to change. Student Affairs departments must stand ready to address these changing needs. Our commitment is to be proactive in our support of diversity and to effectively address any issues and concerns that might arise as we become a more pluralistic community. All Student Affairs staff members must help create an environment in which all members of the university community will find support for their individual growth and development.

To achieve this goal, the Vice Chancellor for Student Affairs expects that significant leadership will be provided by Student Affairs Directors to ensure that all forms of intolerance are challenged and appropriate changes enacted. Throughout the Division, critical inquiry of existing programs and policies, alternative administrative structures and hiring models, continuing educational programs, and viable support systems for all staff and students must become pervasive if true diversity is to be realized. As a formal part of the annual performance evaluation process, each Student Affairs Director will compile a report presenting the efforts and results of departmental activities that support and enhance this goal.

We can help to achieve this goal by becoming actively involved in our support of every individual and by increasing our own and others’ appreciation for all cultures and beliefs. Among the ways in which this goal may be accomplished are:

- participating in programs and performances which illuminate the cultural heritage, traditions, and contributions of minority groups;
- becoming involved in university, community, state, and national minority organizations;
- critically reviewing and generating policies and procedures which are sensitive to the needs of all populations;
- confronting all forms of intolerance in the workplace;
- developing working relationships with people of diverse background and life experiences;
- serving as mentors, internship supervisors and supportive employers;
- acting to address minority under-representation in the Student Affairs staff;
- proactively supporting the application of minority associates for university positions; and
- serving as strong advocates for minority employment and promotion.

Juan N. Franco
Vice Chancellor for Student Affairs
September 2009
As employees of the State of Nebraska and the University of Nebraska-Lincoln, all personnel under the auspices of the Division of Student Affairs, including student employees, are in a position of "public trust." It is expected that conduct while on the job (and while off the job, if such conduct can be construed to be carried back to the workplace as part of one's job) will be such that all staff will be above reproach with respect to sexual harassment and sexual involvement.

Staff should recognize that those working in the Student Affairs Division are often placed in positions of unique affiliation with students- as advisors to individuals and groups, as traveling companions to professional and student events, as supervisors of residential living units, and as employees who are called upon to exercise their best professional judgments with students who may be vulnerable, confused, and/or acting out. Staff conduct should, therefore, be guided by the following principles:

- The central guiding principle in all student-staff relationships must be to avoid the abuse of power and/or trust.
- All staff must ensure that students are provided access to services on a fair and equitable basis. This is difficult, at best, to accomplish if a sexual encounter, real or perceived, has occurred or is in process, simultaneous with evaluative or supervisory responsibilities.
- All staff must avoid any personal conflict of interest so that they can deal objectively and impartially with persons within and outside the institution. Staff must be aware that, in many instances, the appearance of a conflict of interest can be as damaging as an actual conflict.
- Staff must recognize that they exercise considerable influence over students and that sexual encounters with students can be considered suspect given the symmetric and often dependent nature of the student/staff relationship.

It is the policy of the University of Nebraska-Lincoln that sexual harassment by an employee of a student or another employee, including members of the same or opposite gender is prohibited and is subject to the procedures and sanctions contained in the UNL Discrimination and Harassment Policy, http://www.unl.edu/equity/dhpolicies.shtml. UNL policy requires the relinquishment of the supervisory or evaluative role when relationships exist between members of the university community who share sexual, romantic, or domestic relationships including, but not limited to, graduate assistants and students; supervisors and the employees they supervise; and student or employee and administrator, advisor, counselor, or residential staff member who has supervisory responsibility for that student or employee. By adhering to the above principles and policies, Student Affairs staff can be instrumental in the creation and maintenance of a positive campus environment. In an atmosphere of fair and equitable treatment, all members of the UNL Community benefit.

Thus the service is used as a means to redirect inappropriate behaviors through sanctions focused on educational opportunities, student development and personal accountability. Increasingly, the emphasis of the service is to target proactive strategies designed to prevent problematic behavior rather than respond ex post facto.
